Internship Offer Letter

Student Name : PRAGATI MULE
Stream : B.Tech
Branch : B.Tech(Artificial Intelligence and Machine Learning)
Institute Name : JSPM University Pune
Internship Domain : AWS Data Engineering
Internship Duration : April 2026 - June 2026
AICTE Student ID : STU67ffd7528188a1744820050

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	Data Engineering for Data-Driven Organizations	Covers course goals, prerequisites, data-driven decision-making, pipelines, the data engineer's role, modern strategies, and hands-on practice with Amazon S3.
Week 2	Data Elements and Pipeline Design Principles	Covers the five Vs of data, data quality, AWS Well-Architected Framework, modern architectures, pipelines, streaming analytics, and hands-on Athena querying.
Week 3	Securing, Scaling, and Ingesting Data Pipelines	Covers cloud security, scaling infrastructure, ETL vs ELT, data wrangling, cleaning, enriching, validating, and publishing.
Week 4	Efficient Data Management & Big Data	Covers batch vs stream ingestion, ETL with AWS Glue and Kinesis, modern storage pipelines, and Redshift hands-on.
Week 5	Big Data & Preparing Data for Machine Learning	Covers Hadoop, Spark, EMR, and ML lifecycle on AWS including SageMaker, Canvas, modeling, and deployment.
Week 6	Analyzing and Visualizing Data	AWS tool comparison with hands-on analysis using IoT Analytics, QuickSight, and Kinesis Data Firehose.
Week 7	Automating the Pipeline	Automating infrastructure deployment and CI/CD with Step Functions, including ETL pipeline labs using Athena.
Week 8	Bridging to Certification	Overview of AWS certifications, tracks, benefits, and preparation resources.
Final Credential Validation / Internship Grade Point Assessment		

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
